PL GROWTH AND INCOME ETF

Ticker Symbol: PLGI

Primary Listing Exchange for the Fund: Cboe BZX Exchange, Inc.

(a series of the Collaborative Investment Series Trust)

Supplement dated June 24, 2026 to the Prospectus and Summary Prospectus dated October 22, 2025

Effective immediately, the Prospectus and Summary Prospectus of the Fund are hereby revised as described below.

The first paragraph under the "PRINCIPAL INVESTMENT STRATGIES" heading on pages 2 and 8 of the Prospectus and on page 2 of the Summary Prospectus is replaced with the following:

> The Fund is an actively managed exchange traded fund ("ETF") that seeks long-term growth and income through a focused portfolio individual common stocks of any market capitalization. The securities will predominantly be of U.S.-based issuers traded on U.S. exchanges and may also include American Depositary Receipts (ADRs) traded on U.S. exchanges. The Fund's adviser may also utilize targeted ETFs to gain exposure to specific asset classes, market indexes, segments or sectors.

FUND SUMMARY: PL GROWTH AND INCOME ETF

Investment Objectives: The PL Growth and Income ETF (the "Fund") seeks to provide long-term capital appreciation and income.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy, sell, and hold shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below**.

Annual Fund Operating Expenses *(expenses that you pay each year as a percentage of the value of your investment)*	
Management Fees	0.75%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses[(1)]	0.90%
Acquired Fund Fees and Expenses[(2)]	0.01%
Total Annual Fund Operating Expenses	1.66%
Fee Waiver and Reimbursement [(3)]	0.41%
Total Annual Fund Operating Expenses After Fee Waiver	1.25%

(1) Other expenses are estimated for the current fiscal year.

(2) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund's financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.

(3) Collaborative Fund Advisors, LLC (the "Adviser") has contractually agreed to reduce its fees and to reimburse expenses, at least through August 21, 2027 to ensure that Net Annual Fund Operating Expenses (exclusive of any (i) front-end or contingent deferred loads, (ii) portfolio transaction and other investment-related costs (including brokerage fees and commissions), (iii) acquired fund fees and expenses, (iv) fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses), (v) borrowing costs (such as interest and dividend expense on securities sold short), (vi) taxes, (vii) other fees related to underlying investments (such as option fees and expenses or swap fees and expenses), or (viii) extraordinary expenses such as litigation (which may include indemnification of Fund officers and trustees or contractual indemnification of Fund service providers (other than the Adviser)) will not exceed 1.25%. Fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits or the expense limits in place at the time of recoupment. Fee waiver and reimbursement arrangements can decrease the Fund's expenses and boost its performance. This

expense limitation agreement may be terminated at any time, by the Trust's Board of Trustees (the "Board") upon sixty days' written notice to the Adviser.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

1 Year	3 Years
$127	$483

PORTFOLIO TURNOVER: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, may adversely affect the Fund's performance.

PRINCIPAL INVESTMENT STRATEGIES:

The Fund is an actively managed exchange traded fund ("ETF") that seeks long-term growth and income through a focused portfolio of 30-50 individual common stocks of any market capitalization. The securities will predominantly be of U.S.-based issuers traded on U.S. exchanges and may also include American Depositary Receipts (ADRs) traded on U.S. exchanges. The Fund's adviser may also utilize targeted ETFs to gain exposure to specific market indexes or sectors.

Under normal market conditions, the Fund will invest at least 80% of its assets in a combination of equities from growth companies and income-producing securities or options. Growth companies are companies the adviser believes have above average growth potential. The adviser considers a number of factors in determining a company's growth potential, such as if the company's projected earnings per share growth, sales growth per share or free cash flow growth or its trailing earnings per share growth is above the equity market median, if the company's research and development expenses exceed sales, general and administrative expenses, or if the company is raising capital to grow, fund or expand its business. A company's growth potential can be determined under any of these factors.

Additionally, the Fund also invests in corporate bonds, government bonds and preferred stock. Bonds may be of any maturity and may include bonds which are rated below investment grade (also known as "high yield" or "junk bonds"). The Fund may also obtain its fixed income investment exposure by investing in other ETFs that primarily invest in bonds or preferred stock.

The Fund may also invest in money market funds, U.S. Treasury securities and other cash equivalents.

The Fund's adviser invests the Fund's assets in accordance with the following ranges. In determining the allocation of assets in the following ranges, the Adviser will consider macro-economic conditions, micro considerations for specific sectors and companies, reported financial statements and analytical opinions, when available.

Equity Securities	**0% to 100%**
Fixed Income Securities	**0% to 70%**
Cash/Money Markets	**0% to 30%**

To mitigate volatility and generate income, the Fund will employ covered call writing strategies on its equity holdings. The Fund may also write (or sell) cash-secured put options to generate income.

The Adviser utilizes a combination of quantitative and fundamental analysis, examining fundamental, market, technical, and statistical attributes to select investments and implement its options strategies. The Adviser's investment process focuses on identifying securities with long-term growth potential and opportunities to reduce risk and for income generation through options. In evaluating securities with long-term growth potential, the Adviser will consider the projected and reported sales growth data, as well as the classifications of the securities by third-parties and benchmarks.

The Fund may engage in frequent trading of its portfolio, resulting in a higher portfolio turnover rate.

PRINCIPAL RISKS: As with all ETFs, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund's net asset value ("NAV") and performance.

ADR Risk. ADRs may be subject to some of the same risks as direct investment in foreign companies, which includes international trade, currency, political, regulatory and diplomatic risks. In a sponsored ADR arrangement, the foreign issuer assumes the obligation to pay some or all of the depositary's transaction fees. Under an unsponsored ADR arrangement, the foreign issuer assumes no obligations and the depositary's transaction fees are paid directly by the ADR holders. Because unsponsored ADR arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored ADRs and voting rights with respect to the deposited securities are not passed through.

Allocation Risk. Investments in the Fund are subject to risks related to the Adviser's allocation choices. The selection of the assets could cause the Fund to lose value or its results lag relevant benchmarks or other funds with similar objectives.

Below Investment Grade Securities Risk. Although bonds rated below investment grade (also known as "junk" securities) generally pay higher rates of interest than investment

grade bonds, bonds rated below investment grade are higher risk, which may result in loss of income and principal.

Cash and Cash Equivalents Risk. At any time, the Fund may have significant investments in cash or cash equivalents. When a substantial portion of a portfolio is held in cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time.

Common Stock Risk. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises.

Corporate Bond Risk. Corporate bonds are backed only by the issuer, and therefore, investments in corporate bonds are subject to issuer risk. Additionally, credit risk is created when the debt issuer fails to pay interest and principal in a timely manner, or negative perceptions of the issuer's ability to make such payments may cause the price of that debt to decline.

ETF Structure Risk. The Fund is structured as an ETF and as a result is subject to the special risks, including:

- The market prices of shares will fluctuate in response to changes in NAV and supply and demand for shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly. This means that shares may trade at a discount to NAV.

- In times of market stress, market makers may step away from their role market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Fund shares and the Fund's NAV.

- In stressed market conditions, the market for the Fund's shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Fund's shares may, in turn, lead to differences between the market value of the Fund's shares and the Fund's NAV.

- When all or a portion of an ETF's underlying securities trade in a market that is closed when the market for the shares is open, there may be changes from the last quote of the closed market and the quote from the Fund's domestic trading day, which could lead to differences between the market value of the shares and the Fund's NAV.

Exchange Traded Funds Risk. The cost of investing in the Fund will be higher than the cost of investing directly in the ETFs in which it invests and may be higher than other mutual funds that invest directly in stocks and bonds because of duplicate management fees and

brokerage and trading costs. Each other ETF is subject to specific risks, depending on the nature of the ETF.

Fixed Income Risk. Typically, a rise in interest rates causes a decline in the value of fixed income securities. In general, the market price of fixed income securities with longer maturities will decrease more in response to rising interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by an American Underlying Fund or Other Underlying Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). Current conditions have resulted in a rise in interest rates, which in turn may result in a decline in the value of the fixed income investments held by an American Underlying Fund or Other Underlying Fund. As a result, for the present, interest rate risk may be heightened.

Foreign Risk. Investing in notes of foreign issuers involves risks not typically associated with U.S. investments, including adverse political, social and economic developments, less liquidity, greater volatility, less developed or less efficient trading markets, political instability and differing auditing and legal standards.

Growth Risk. Growth-oriented securities purchased by the Fund may involve large price swings and potential for loss. If the perceptions of a company's growth potential are wrong, the securities purchased may not perform as expected, reducing the Fund's return.

Large Capitalization Stock Risk. Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large capitalization companies has trailed the overall performance of the broader securities market.

Management Risk. The portfolio manager's judgments about the attractiveness, value and potential appreciation of particular stocks or other securities in which the Fund invests may prove to be incorrect and there is no guarantee that the portfolio manager's judgment will produce the desired results.

Market and Geopolitical Risk. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects.

Money Market Risk. The Fund's investment in a money market fund is not a deposit of any bank and is not insured or guaranteed by the FDIC or any other government agency. Certain money market funds seek to preserve the value of their shares at $1.00 per share, although there can be no assurance that they will do so, and it is possible to lose money by investing in such a money market fund. A major or unexpected change in interest rates or a decline in the credit quality of an issuer or entity providing credit support, an inactive trading market for money market instruments, or adverse market, economic, industry, political, regulatory, geopolitical, and other conditions could cause the share price of such a money market fund to fall below $1.00. Other money market funds price and transact at a "floating" NAV that will fluctuate along with changes in the market-based value of fund assets. Shares sold utilizing a floating NAV may be worth more or less than their original purchase price. Recent changes in the regulation of money market funds may affect the operations and structures of money market funds.

Options Risk. The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions and depends on the ability of the Fund's portfolio manager to forecast market movements correctly. The prices of options are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, or in interest or currency exchange rates, including the anticipated volatility, which in turn are affected by fiscal and monetary policies and by national and international political and economic events. The effective use of options also depends on the Fund's ability to terminate option positions at times deemed desirable to do so. There is no assurance that the Fund will be able to effect closing transactions at any particular time or at an acceptable price. In addition, there may at times be an imperfect correlation between the movement in values of options and their underlying securities and there may at times not be a liquid secondary market for certain options. Lastly, the trading of options is subject to transaction costs that may impact the Fund's returns.

Portfolio Turnover Risk. The Fund may turn over its portfolio investments for a variety of reasons, including for asset allocation rebalances, temporary defensive positions, dividend capture strategies, or short-term trading strategies. Investments may be sold when, in the opinion of the Adviser, investment considerations warrant such action, without regard to the length of time held. These policies, together with the ability of the Fund to effect short sales of securities and to engage in transactions in derivatives, may have the effect of increasing the Fund's annual rate of portfolio turnover. If investments are not held for the applicable holding periods, dividends paid on them will not qualify for advantageous U.S. federal tax rates.

Small and Medium Capitalization Stock Risk. The earnings and prospects of small and medium sized companies are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

U.S. Treasuries Risk. U.S. Treasury obligations are backed by the "full faith and credit" of the U.S. government and generally have negligible credit risk. Securities issued or

guaranteed by federal agencies or authorities and U.S. government-sponsored instrumentalities or enterprises may or may not be backed by the full faith and credit of the U.S. government.

Performance: Since the Fund has not yet launched, the performance section is omitted. In the future, performance information will be presented in this section of this Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholders semi-annually.

Investment Adviser: Collaborative Fund Advisors, LLC

Investment Sub-Adviser: Retireful, LLC

Portfolio Manager: Michael Goldenberg has served as a portfolio manager since its inception in October 2025.

Purchase and Sale of Fund Shares: The Fund will issue and redeem shares at NAV only in large blocks of 10,000 shares (each block of Shares is called a "Creation Unit"). Creation Units are issued and redeemed for cash and/or in-kind for securities. Individual shares may only be purchased and sold in secondary market transactions through brokers. Except when aggregated in Creation Units, the shares are not redeemable securities of the Fund.

Shares of the Fund are listed for trading on CBOE BZX Exchange, Inc. (the "Exchange") and trade at market prices rather than NAV. Shares of the Fund may trade at a price that is greater than, at, or less than NAV.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-free plan. If you are investing through a tax free plan, you will be taxed upon withdrawal from your account.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

INVESTMENT OBJECTIVE

Fund	Investment Objective
PL Growth and Income ETF	The Fund seeks to provide long-term capital appreciation and income.

The Fund's investment objective may be changed by the Collaborative Investment Series Trust's (the "Trust") Board of Trustees (the "Board") upon 60 days' written notice to shareholders.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange traded fund ("ETF") that seeks long-term growth and income through a focused portfolio of 30-50 individual common stocks of any market capitalization. The securities will predominantly be of U.S.-based issuers traded on U.S. exchanges and may also include American Depositary Receipts (ADRs) traded on U.S. exchanges. The Fund's adviser may also utilize targeted ETFs to gain exposure to specific market indexes or sectors.

Under normal market conditions, the Fund will invest at least 80% of its assets in a combination of equities from growth companies and income-producing securities or options. Growth companies are companies the adviser believes have above average growth potential. The adviser considers a number of factors in determining a company's growth potential, such as if the company's projected earnings per share growth, sales growth per share or free cash flow growth or its trailing earnings per share growth is above the equity market median, if the company's research and development expenses exceed sales, general and administrative expenses, or if the company is raising capital to grow, fund or expand its business. A company's growth potential can be determined under any of these factors.

Additionally, the Fund also invests in corporate bonds, government bonds and preferred stock. Bonds may be of any maturity and may include bonds which are rated below investment grade (also known as "high yield" or "junk bonds"). The Fund may also obtain its fixed income investment exposure by investing in other ETFs that primarily invest in bonds or preferred stock.

The Fund's adviser invests the Fund's assets in accordance with the following ranges. In determining the allocation of assets in the following ranges, the Adviser will consider macro-economic conditions, micro considerations for specific sectors and companies, reported financial statements and analytical opinions, when available.

Equity Securities	**0% to 100%**
Fixed Income Securities	**0% to 70%**
Cash/MMF	**0% to 30%**

To mitigate volatility and generate income, the Fund will employ covered call writing strategies on its equity holdings. The Fund may also write (or sell) cash-secured put options to generate income.

The Fund may also directly engage in options strategies. The option strategies to be used by the Fund include covered calls and cash secured puts on equities.

- *Covered Calls*: In a covered call, the Fund writes a call option on a stock it owns.

- *Cash Secured Puts*: A strategy where the Fund writes a put option and has the cash readily available to purchase the underlying stock if the option is exercised

The Adviser utilizes a combination of quantitative and fundamental analysis, examining fundamental, market, technical, and statistical attributes to select investments and implement its options strategies. The Adviser's investment process focuses on identifying securities with long-term growth potential and opportunities to reduce risk and for income generation through options. In evaluating securities with long-term growth potential, the Adviser will consider the projected and reported sales growth data, as well as the classifications of the securities by third-parties and benchmarks.

The Fund may engage in frequent trading of its portfolio, resulting in a higher portfolio turnover rate. A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs affect the Fund's performance.

PRINCIPAL INVESTMENT RISKS

The following describes the risks born by the Fund with respect to its investments.

ADR Risk. ADRs may be subject to some of the same risks as direct investment in foreign companies, which includes international trade, currency, political, regulatory and diplomatic risks. In a sponsored ADR arrangement, the foreign issuer assumes the obligation to pay some or all of the depositary's transaction fees. Under an unsponsored ADR arrangement, the foreign issuer assumes no obligations and the depositary's transaction fees are paid directly by the ADR holders. Because unsponsored ADR arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored ADRs and voting rights with respect to the deposited securities are not passed through.

Allocation Risk. Investments in the Fund are subject to risks related to the Adviser's allocation choices. The selection of the assets could cause the Fund to lose value or its results lag relevant benchmarks or other funds with similar objectives.

Below Investment Grade Securities Risk. Although bonds rated below investment grade (also known as "junk" securities) generally pay higher rates of interest than investment grade bonds, bonds rated below investment grade are higher risk, which may result in loss of income and principal.

Cash and Cash Equivalents Risk. At any time, the Fund may have significant investments in cash or cash equivalents. When a substantial portion of a portfolio is held in cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time.

Common Stock Risk. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Investor perceptions are based on various and unpredictable factors, including expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises.

Corporate Bond Risk. Corporate bonds generally have higher interest rates than other fixed income instruments, like certificates of deposit and U.S. Treasury securities, and also bear greater risk, as they are backed only by the issuer, and therefore, investments in corporate bonds are subject to issuer risk. Additionally, credit risk is created when the debt issuer fails to pay interest and principal in a timely manner, or negative perceptions of the issuer's ability to make such payments may cause the price of that debt to decline.

ETF Structure Risk. The Fund is structured as an ETF and as a result is subject to the special risks, including:

- The market prices of the Fund's shares will fluctuate in response to changes in net asset value ("NAV") and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV.

- In times of market stress, market makers may step away from their role market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Fund shares and the Fund's NAV.

- In stressed market conditions, the market for the Fund's shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Fund's shares may, in turn, lead to differences between the market value of the Fund's shares and the Fund's NAV.

- When all or a portion of an ETF's underlying securities trade in a market that is closed when the market for the shares is open, there may be changes from the last quote of the closed market and the quote from the Fund's domestic trading day, which could lead to differences between the market value of the shares and the Fund's NAV.

Exchange Traded Funds Risk. The cost of investing in the Fund will be higher than the cost of investing directly in the ETFs in which it invests and may be higher than other mutual funds that invest directly in stocks and bonds because of duplicate management fees and

brokerage and trading costs. Each other ETF is subject to specific risks, depending on the nature of the ETF.

Fixed Income Risk. Typically, a rise in interest rates causes a decline in the value of fixed income securities. In general, the market price of fixed income securities with longer maturities will decrease more in response to rising interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by an American Underlying Fund or Other Underlying Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). Current conditions have resulted in a rise in interest rates, which in turn may result in a decline in the value of the fixed income investments held by an American Underlying Fund or Other Underlying Fund. As a result, for the present, interest rate risk may be heightened.

Foreign Risk. Foreign investing involves risks not typically associated with U.S. investments, including adverse fluctuations in foreign currency values, adverse political, social and economic developments, less liquidity, greater volatility, less developed or less efficient trading markets, political instability and differing auditing and legal standards. Investing in emerging markets imposes risks different from, or greater than, risks of investing in foreign developed countries.

Growth Risk. Growth-oriented securities purchased by the Fund may involve large price swings and potential for loss. If the perceptions of a company's growth potential are wrong, the securities purchased may not perform as expected, reducing the Fund's return.

Large Capitalization Stock Risk. Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large capitalization companies has trailed the overall performance of the broader securities market.

Management Risk. The Adviser's assessment of the attractiveness and potential appreciation of particular investments or markets in which the Fund invests may prove to be incorrect and there is no guarantee that the Adviser's investment strategy will produce the desired results.

Market and Geopolitical Risk. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It

is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund's portfolio. It is not known how long such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your Fund investment. Therefore, the Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns.

Money Market Risk. The Fund's investment in a money market fund is not a deposit of any bank and is not insured or guaranteed by the FDIC or any other government agency. Certain money market funds seek to preserve the value of their shares at $1.00 per share, although there can be no assurance that they will do so, and it is possible to lose money by investing in such a money market fund. A major or unexpected change in interest rates or a decline in the credit quality of an issuer or entity providing credit support, an inactive trading market for money market instruments, or adverse market, economic, industry, political, regulatory, geopolitical, and other conditions could cause the share price of such a money market fund to fall below $1.00. Other money market funds price and transact at a "floating" NAV that will fluctuate along with changes in the market-based value of fund assets. Shares sold utilizing a floating NAV may be worth more or less than their original purchase price. Recent changes in the regulation of money market funds may affect the operations and structures of money market funds.

Options Risk. The use of options involves investment strategies and risks different from those associated with ordinary portfolio securities transactions and depends on the ability of the Fund's portfolio manager to forecast market movements correctly. The prices of options are volatile and are influenced by, among other things, actual and anticipated changes in the value of the underlying instrument, or in interest or currency exchange rates, including the anticipated volatility, which in turn are affected by fiscal and monetary policies and by national and international political and economic events. The effective use of options also depends on the Fund's ability to terminate option positions at times deemed desirable to do so. There is no assurance that the Fund will be able to effect closing transactions at any particular time or at an acceptable price. In addition, there may at times be an imperfect correlation between the movement in values of options and their underlying securities and there may at times not be a liquid secondary market for certain options. Lastly, the trading of options is subject to transaction costs that may impact the Fund's returns.

Portfolio Turnover Risk. The Fund may turn over its portfolio investments for a variety of reasons, including for asset allocation rebalances, temporary defensive positions, dividend capture strategies, or short-term trading strategies. Investments may be sold when, in the opinion of the Adviser, investment considerations warrant such action, without regard to the length of time held. These policies, together with the ability of the Fund to effect short sales of securities and to engage in transactions in derivatives, may have the effect of increasing the Fund's annual rate of portfolio turnover. If investments are not held for the applicable holding periods, dividends paid on them will not qualify for advantageous U.S. federal tax rates.

Small and Medium Capitalization Stock Risk. The earnings and prospects of small and medium sized companies are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

U.S. Treasuries Risk. U.S. Treasury obligations are backed by the "full faith and credit" of the U.S. government and generally have negligible credit risk. Securities issued or guaranteed by federal agencies or authorities and U.S. government-sponsored instrumentalities or enterprises may or may not be backed by the full faith and credit of the U.S. government.

Temporary Investments: To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in high-quality short-term debt securities and money market instruments. These short-term debt securities and money market instruments include shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, and U.S. Government securities. While the Fund is in a defensive position, the Fund may not achieve its investment objective. Furthermore, to the extent that the Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because the Fund pays its pro-rata portion of such money market funds' advisory fees and operational fees. The Fund may also invest a substantial portion of its assets in such instruments at any time to maintain liquidity or pending selection of investments in accordance with its policies.

Portfolio Holdings Disclosure: A description of the Fund's policies and regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information ("SAI").

Cybersecurity: The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its NAV; impediments to trading; the inability of the Fund, the Adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT OF THE FUND

INVESTMENT ADVISER

Collaborative Fund Advisors, LLC, located at 500 Damonte Ranch Pkwy, Building 700, Unit 700, Reno, NV 89521, serves as investment adviser to the Fund. Subject to the authority of the Board, the Adviser is responsible for management of the Fund's portfolio. The Adviser is responsible for assuring the Fund's investments are managed according to its investment objective, policies, and restrictions. Pursuant to an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser, the Fund pays the Adviser, on a monthly basis, an annual advisory fee of 0.75% of its average daily net assets.

The Adviser has contractually agreed to reduce its fees and to reimburse expenses, at least through August 21, 2027 to ensure that net annual fund operating expenses (exclusive of any (i) front-end or contingent deferred loads, (ii) portfolio transaction and other investment-related costs (including brokerage fees and commissions), (iii) acquired fund fees and expenses, (iv) fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses), (v) borrowing costs (such as interest and dividend expense on securities sold short), (vi) taxes, (vii) other fees related to underlying investments (such as option fees and expenses and swap fees and expenses) or (viii) extraordinary expenses such as litigation (which may include indemnification of Fund officers and trustees or contractual indemnification of Fund service providers (other than the Adviser)) will not exceed 1.25%. Fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits or the expense limits in place at the time of recoupment. Fee waiver and reimbursement arrangements can decrease the Fund's expenses and boost its performance. This expense limitation agreement may be terminated at any time, by the Board upon sixty days written notice to the Adviser.

INVESTMENT SUB-ADVISER

Retireful, LLC (the "Sub-Adviser"), located at 120 N. Washington, Suite 300, Lansing, MI 48933, serves as investment sub-adviser to the Fund. Subject to the authority and oversight of the Board and the Adviser, the Sub-Adviser is responsible for the trade execution management of the Fund's investment portfolio. Pursuant to a sub-advisory agreement between the Adviser and the Sub-Adviser, the Sub-Adviser is entitled to receive from the Adviser (not the Fund), on a monthly basis, an annual advisory fee equal to 0.10% of the Fund's net assets.

A discussion regarding the basis for the Board's approval of the Advisory Agreement and Sub-Advisory Agreement will be available in the Fund's first shareholder report on Form N-CSR.

PORTFOLIO MANAGER

Michael Goldenberg

Michael Goldenberg has been a portfolio manager with the Adviser since 2025. He has also served as a financial adviser with AFIN Family Wealth Management since 2019.

The Fund's SAI provides additional information about the portfolio manager's compensation structure, other accounts managed by the portfolio manager, and the portfolio manager's ownership of Fund shares.

NET ASSET VALUE

The NAV and offering price (NAV plus any applicable sales charges) of each class of shares is determined as of the close of the Chicago Board Options Exchange BZX Exchange, Inc. (normally 4:00 p.m. Eastern Time) on each day the Exchange is open for business (the "Valuation Time"). NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The Exchange is closed on weekends and New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a share class for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the Exchange on that day.

The Fund's securities or other investment assets for which market quotations are readily available will be valued at current market value based upon such market quotations as of the Valuation Time. The Fund may use independent pricing agents to provide current market values. Generally, the Fund's securities are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith and evaluated as to the reliability of the fair value method used by the Board on a quarterly basis, in accordance with procedures approved by the Board. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined using the "fair value" procedures approved by the Board. Fair value pricing involves

subjective judgments and it is possible that the fair value determined for a security may be materially different from the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board has delegated execution of these procedures to the Adviser. The team may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

The Fund may use independent pricing services to assist in calculating the value of the Fund's securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. The Fund may invest in foreign securities that are primarily listed on foreign exchanges that may trade on weekends or other days when the Fund does not price its shares, the value of the Fund's portfolio may change on days when you may not be able to buy or sell Fund shares. In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the Exchange. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund's portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the securities will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund's fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine net asset value or the price that may be realized upon the actual sale of the security.

With respect to any portion of the Fund's assets that are invested in one or more open-end management investment companies that are registered under the Investment Company Act of1940, as amended (the "1940 Act"), the Fund's net asset value is calculated based upon the net asset values of the registered open-end management investment companies in which the Fund invests, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

Premium/Discount Information

Most investors will buy and sell Shares of the Fund in secondary market transactions through brokers at market prices and the Fund's Shares will trade at market prices. The market price of Shares of the Fund may be greater than, equal to, or less than NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares of the Fund.

Information regarding how often the Shares of the Fund traded at a price above (at a premium to) or below (at a discount to) the NAV of the Fund during the past four calendar

quarters, when available, can be found at plgrowthincome.com.

HOW TO BUY AND SELL SHARES

Shares of the Fund will be listed for trading on the Exchange under the symbol PLGI. Share prices are reported in dollars and cents per Share. Shares can be bought and sold on the secondary market throughout the trading day like other publicly traded shares and Shares typically trade in blocks of less than a Creation Unit. There is no minimum investment required. Shares may only be purchased and sold on the secondary market when the Exchange is open for trading. The Exchange is open for trading Monday through Friday and is closed on weekends and the following holidays, as observed: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

Authorized Participants that have entered into contracts with the Fund's distributor may acquire Shares directly from the Fund, and Authorized Participants may tender their Shares for redemption directly to the Fund, at NAV per Share only in large blocks, or Creation Units, of 10,000 shares. Purchases and redemptions directly with the Fund must follow the Fund's procedures, which are described in the SAI.

The Fund may liquidate and terminate at any time without shareholder approval.

Share Trading Prices

The approximate value of Shares of the Fund, an amount representing on a per share basis the sum of the current market price of the securities accepted by the Fund in exchange for Shares of the Fund and an estimated cash component will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a "real-time" update of the NAV per Share of the Fund because the approximate value may not take into account certain Fund expenses and may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value of the Shares, and the Fund does not make any warranty as to the accuracy of these values.

Book Entry

Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares of the Fund and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC

include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or "street name" form.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund's Shares can only be purchased and redeemed directly from the Fund in Creation Units by Authorized Participants who have entered into agreements with the Fund's distributor. The vast majority of trading in the Fund's Shares occurs on the secondary market. Since the secondary market trades do not directly involve the Fund, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund's trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Fund, to the extent effected in-kind (*i.e.*, for securities), those trades do not cause the harmful effects that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund's ability to achieve its investment objective. However, direct trading by Authorized Participants is critical to ensuring that the Fund's Shares trade at or close to NAV. The Fund also employs fair valuation pricing to minimize potential dilution from market timing. In addition, the Fund imposes transaction fees on purchases and redemptions of Fund Shares to cover the custodial and other costs incurred by the Fund in effecting trades. These fees increase if an investor substitutes cash in part or in whole for securities, reflecting the fact that the Fund's trading costs increase in those circumstances. Given this structure, the Trust has determined that it is not necessary to adopt policies and procedures to detect and deter market timing of the Fund's Shares.

DIVIDENDS, OTHER DISTRIBUTIONS AND TAXES

Unlike interests in conventional mutual funds, which typically are bought and sold from and to the fund only at closing NAVs, the Fund's Shares are traded throughout the day in the secondary market on a national securities exchange on an intra-day basis and are created and redeemed in-kind and/or for cash in Creation Units at each day's next calculated NAV. In-kind arrangements are designed to protect ongoing shareholders from the adverse effects on the Fund's portfolio that could arise from frequent cash redemption transactions. In a conventional mutual fund, redemptions can have an adverse tax impact on taxable shareholders if the mutual fund needs to sell portfolio securities to obtain cash to meet net fund redemptions. These sales may generate taxable gains for the ongoing shareholders of the mutual fund, whereas the Shares' in-kind redemption mechanism generally will not lead to a tax event for the Fund or its ongoing shareholders.

Ordinarily, dividends from net investment income, if any, are declared and paid quarterly by the Fund. The Fund distributes its net realized capital gains, if any, to shareholders annually.

Distributions in cash may be reinvested automatically in additional Shares if the broker through whom you purchased Shares makes such an option available.

Taxes

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

- The Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

Taxes on Distributions

As stated above, dividends from net investment income, if any, ordinarily are declared and paid quarterly by the Fund. The Fund may also pay a special distribution at the end of a calendar year to comply with federal tax requirements. Distributions from the Fund's net investment income, including net short-term capital gains, if any, are taxable to you as ordinary income, except that the Fund's dividends attributable to its "qualified dividend income" (*i.e.*, dividends received on stock of most domestic and certain foreign corporations with respect to which the Fund satisfies certain holding period and other restrictions), if any, generally are subject to federal income tax for non-corporate shareholders who satisfy those restrictions with respect to their Fund shares at the rate for net capital gain. A part of the Fund's dividends also may be eligible for the dividends-received deduction allowed to corporations – the eligible portion may not exceed the aggregate dividends the Fund receives from domestic corporations subject to federal income tax (excluding REITs) and excludes dividends from foreign corporations – subject to similar restrictions. However, dividends a corporate shareholder deducts pursuant to that deduction are subject indirectly to the federal alternative minimum tax.

In general, your distributions are subject to federal income tax when they are paid, whether you take them in cash or reinvest them in the Fund (if that option is available). Distributions reinvested in additional Shares of the Fund through the means of a dividend reinvestment service, if available, will be taxable to shareholders acquiring the additional Shares to the same extent as if such distributions had been received in cash. Distributions of net long-term capital gains, if any, in excess of net short-term capital losses are taxable as long-term capital gains, regardless of how long you have held the Shares.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of your basis in the Shares and as capital gain thereafter. A distribution will reduce the Fund's NAV per Share and may be taxable to you as ordinary income or capital gain (as described above) even though, from an investment standpoint, the distribution may constitute a return of capital.

By law, the Fund is required to withhold up to 24% of your distributions and redemption proceeds if you have not provided the Fund with a correct Social Security number or other taxpayer identification number and in certain other situations.

Taxes on Exchange-Listed Share Sales

Any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses from sales of Shares may be limited.

Taxes on Purchase and Redemption of Creation Units

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered plus any Cash Component it pays. An Authorized Participant that exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received plus any cash equal to the difference between the NAV of the Shares being redeemed and the value of the securities. The Internal Revenue Service ("Service"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales" or for other reasons. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you purchased or sold and at what price. See "Tax Status" in the SAI for a description of the newly effective requirement regarding basis determination methods applicable to Share redemptions and the Fund's obligation to report basis information to the Service.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in the Shares under all applicable tax laws. See "TAX STATUS" in the SAI for more information.

FUND SERVICE PROVIDERS

Collaborative Fund Services, LLC serves as the Trust's administrator, which has its principal office at 500 Damonte Ranch Parkway, Building 700, Unit 700, Reno, NV 89521.

Citi Fund Services Ohio, Inc. is the Fund's administrator and fund accountant. It has its

principal office at 4400 Easton Commons, Suite 200, Columbus, OH 43219, and is primarily in the business of providing administrative, fund accounting and regulatory filing services to retail and institutional mutual funds.

Citibank, N.A., is the Fund's custodian. It has its principal office at 388 Greenwich Street, New York, NY 10048.

Paralel Distributors LLC (the "Distributor"), located at 1700 Broadway Suite 1850, Denver, CO 80290, is the distributor for the shares of the Fund. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA").

Thompson Hine LLP, 41 South High Street, Suite 1700, Columbus, OH 43215, serves as legal counsel to the Trust.

Cohen & Company, Ltd., located at 1835 Market Street, Suite 310, Philadelphia, PA 19103, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

OTHER INFORMATION

Continuous Offering

The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Fund on an ongoing basis, a "distribution," as such term is used in the Securities Act of 1933, as amended (the "Securities Act"), may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not underwriters but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms

should note that dealers who are not underwriters but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

Dealers effecting transactions in the Shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.

FINANCIAL HIGHLIGHTS

Because the Fund has only recently commenced investment operations, no financial highlights are available for the Fund at this time. In the future, financial highlights will be presented in this section of the Prospectus.

PRIVACY NOTICE

Collaborative Investment Series Trust

Rev. November 2017

FACTS	**WHAT DOES COLLABORATIVE INVESTMENT SERIES TRUST DO WITH YOUR PERSONAL INFORMATION?**

Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some, but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

What?	The types of personal information we collect and share depends on the product or service that you have with us. This information can include: ● Social Security number and wire transfer instructions ● account transactions and transaction history ● investment experience and purchase history When you are *no longer* our customer, we continue to share your information as described in this notice.

How?	All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Collaborative Investment Series Trust chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information:	**Does Collaborative Investment Series Trust share information?**	**Can you limit this sharing?**
For our everyday business purposes - such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus.	**YES**	**NO**
For our marketing purposes - to offer our products and services to you.	**NO**	**We don't share**
For joint marketing with other financial companies.	**NO**	**We don't share**
For our affiliates' everyday business purposes - information about your transactions and records.	**NO**	**We don't share**
For our affiliates' everyday business purposes - information about your creditworthiness.	**NO**	**We don't share**

For nonaffiliates to market to you	NO	We don't share
QUESTIONS?	**Call 1-877-694-3532**	

Collaborative Investment Series Trust

What we do:	
How does Collaborative Investment Series Trust protect my personal information?	To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings. Our service providers are held accountable for adhering to strict policies and procedures to prevent any misuse of your nonpublic personal information.
How does Collaborative Investment Series Trust collect my personal information?	We collect your personal information, for example, when you ● open an account or deposit money ● direct us to buy securities or direct us to sell your securities ● seek advice about your investments We also collect your personal information from others, such as credit bureaus, affiliates, or other companies.
Why can't I limit all sharing?	Federal law gives you the right to limit only: ● sharing for affiliates' everyday business purposes – information about your creditworthiness. ● affiliates from using your information to market to you. ● sharing for nonaffiliates to market to you. State laws and individual companies may give you additional rights to limit sharing.

Definitions	
Affiliates	Companies related by common ownership or control. They can be financial and nonfinancial companies. ● *Collaborative Investment Series Trust does not share with our affiliates.*

Non-affiliates	Companies not related by common ownership or control. They can be financial and nonfinancial companies. ● *Collaborative Investment Series Trust does not share with nonaffiliates so they can market to you.*
Joint marketing	A formal agreement between non-affiliated financial companies that together market financial products or services to you. ● *Collaborative Investment Series Trust doesn't jointly market.*

Adviser	**Collaborative Fund Advisors, LLC** 500 Damonte Ranch Pkwy, Building 700 Unit 700 Reno, NV 89521
